WHAT HAPPENED?

Microsoft released their July 2017 updates to address 31 Critical and 32 Important vulnerabilities in various Microsoft products.

Advanced Users: For a complete description of the security enhancements and affected software refer to Microsoft Security Bulletin Summary for June 2017
AFFECTED SYSTEMS:

- Internet Explorer
- Microsoft Edge
- Microsoft Windows
- Microsoft Office and Microsoft Office Services and Web Apps
- .NET Framework
- Adobe Flash Player
- Microsoft Exchange Server

WHAT'S THE PROBLEM?

Some of these vulnerabilities, if exploited, could allow an attacker to take control of your computer.

HOW DO I PROTECT MY COMPUTER?

Update your software

1. If you are supported by ITFS or have different IT support, no action on your part is required.
2. If you do not have IT support or they do not support your computer, refer to Microsoft Security Update Guide at [1]
