WHAT HAPPENED?

Google has released Chrome version 60.0.3112.78 to address multiple vulnerabilities.

Advanced Users: For a complete description of the security enhancement and affected software refer to:

AFFECTED SYSTEMS:

- Chrome for Windows, MAC and Linux
WHAT'S THE PROBLEM?

Exploiting these vulnerabilities may lead to an unauthorized individual taking over an effected system.

HOW DO I PROTECT MY COMPUTER?

Update your software

1. If you are supported by ITFS or have different IT support, no action on your part is required.
2. If you do not have IT support, updates may be obtained by opening your Chrome browser and then:
   - Clicking on the, ?Chrome? dropdown menu, and then
   - Clicking on, ?About Google Chrome? within the dropdown menu.
