

Everyone wins a prize! Visit <http://awareness.ucsf.edu>

So many social networking sites, but only one password?
Make sure your UCSF password is different.

Using a different password ensures that a breach of a social networking site does not affect your UCSF account. Additionally, never put confidential information on social networking websites.

Be smart – go to security.ucsf.edu and use our free tools to protect the UCSF community. Together, we can advance health worldwide - securely.
