Cisco Jabber for iPad
Cisco Jabber for iPad allows you to make and receive video calls from your iPad to other UCSF users.

To use Jabber:
- Download the Cisco Jabber for iPad from the Apple App store to your iPad.
- Once downloaded start the app and select Company Provided Accounts then TelePresence Video Communication Server.
- Login with your Movi account user name and password. If you do not have a Movi account, you can request one through Employee Self Service or calling 514-4100.
- Server settings are below:
  - Username/Password: Movi account info
  - Internal server address: tmvsc.ucsf.edu
  - External server address: tmvcs.ucsf.edu
  - SIP domain address: ucsf.edu
- Click Sign in to log into the UCSF TelePresence VCS.

Placing a Video Call
Once logged into Cisco Jabber you can place video calls by:
- Searching for contacts by last name in the UCSF TelePresence Directory.
- Using the Keypad if you know the users last name or need to call into a bridge number.

Accepting a Video Call
If a user calls you on your iPad, a window with the first and last name of the user will pop up and you can Decline or Accept the call.

Contacts and Favorites
You can add contacts by:
- Clicking on the Contacts button and searching for users the directory, then “Add contact”.
- Using the Keypad if you know the users last name then “Add contact”.
- Add Favorites to your contacts by using the Favorite button.

Call History
The Resents button will show all calls made from your iPad as well as any missed calls.

Self-View
The Self-View button will show the mirror image of the person placing the call.

Settings
Within the Settings button of Cisco Jabber for iPad, you can configure:
- Sign Out – To Sign Out of Jabber
