Security update

Impact

VMware users

WHAT HAPPENED?

VMware has released a security update to address an IMPORTANT vulnerability in VMware Tools.

Advanced Users: For a complete description of the security enhancement and affected software refer to:

AFFECTED SYSTEMS:

- VMware Tools
WHAT'S THE PROBLEM?

A remote attacker could exploit this vulnerability to take control of an affected system.

HOW DO I PROTECT MY COMPUTER?

1. If you are supported by ITFS or have different IT support, no action on your part is required.
2. If you do not have IT support, updates may be obtained through the VMware Security Advisories listed at: https://www.vmware.com/security/advisories.html [1]
