

Security Update: Microsoft Released March 2014 Updates to Address 2 Critical and 3 Important Vulnerabilities

Microsoft Released March 2014 Updates to Address 2 Critical and 3 Important Vulnerabilities

Status Type

Security Update

Private

Public

Date and Time

Tuesday, March 11, 2014 - 17:29

Reason

Security Updates

Impact

Microsoft Windows and Internet Explorer Users

WHAT HAPPENED?

Microsoft released their March 2014 updates to address 2 Critical and 3 Important vulnerabilities in Microsoft Software.

Advanced Users: For a complete description of the security enhancements and affected software refer to Microsoft Security Bulletin Summary for March 2014 at <http://technet.microsoft.com/library/security/ms14-mar> [1].

AFFECTED SYSTEMS:

- Internet Explorer
- Microsoft Silverlight
- Microsoft Windows

WHAT'S THE PROBLEM?

If any of the vulnerabilities are exploited, this could allow an attacker to take control of your computer and/or by-pass security features.

HOW DO I PROTECT MY COMPUTER?

Update your software

1. If you have IT support, no action on your part is required.
2. If you do not have IT support or they do not support your computer, refer to Microsoft Security Bulletin Summary for March 2014 at <http://technet.microsoft.com/library/security/ms14-mar> ^[1] on how to obtain the latest updates for your specific software.
