

400MB Limit

Jennifer Thi on February 13, 2020

CipherCloud does not encrypt any file over 400MB.

The bigger a file is, longer it will take to decrypt the file. You can still store files up to 15GB, but they will not be encrypted if it is over 400MB. We recommend that you do not store files that contain restricted data larger than 400MB in your UCSF Box.
