UCSF Print SMART

UCSF Print SMART Go Live July 1st 2017

Under the UC ?Leveraging Scale for Value Initiative?, Print Management was identified as one of the service categories with substantial opportunity for cost reduction, environmental impact, productivity improvement and security/compliance requirements.

The Health System issued an RFP and as a result has partnered with Ricoh, USA to manage our document output (copy, print, fax and scan) across the UCSF Health system. Ricoh?s expertise will streamline and align our processes and infrastructure to create a manageable, dependable print management program that will reduce our cost and increase employee productivity as we continue to meet and exceed our patient care standards.

Currently UCSF Health is moving forward with the Ricoh Print Management Program. **UCSF Campus is not included in the go live for July 1st. UCSF Campus is still determining the best way forward for Print Management.**

Please see the Print Management Services FAQ^[1] page for more details in UCSF PrintSMART.
