WHAT HAPPENED?

Google has released Chrome version 63.0.3239.84 for Windows, Mac, and Linux to address multiple vulnerabilities.

Advanced Users: For a complete description of the security enhancement and affected software refer to the following Stable Channel Update for Desktop:

- [https://chromereleases.googleblog.com/2017/12/stable-channel-update-for-desktop.html][1]
AFFECTED SYSTEMS:

- Chrome for Windows, Mac, and Linux.

WHAT'S THE PROBLEM?

Exploitation of one these vulnerabilities could allow an attacker to take control of an affected system.

HOW DO I PROTECT MY COMPUTER?

Update your software

1. If you are supported by ITFS or have different IT support, no action on your part is required.
2. If you do not have IT support, please view the Stable Channel Update referred to above.
