Apple users

WHAT HAPPENED?

Apple has released security updates to address vulnerabilities in various Apple products.

Advanced Users: For a complete description of the security enhancements and affected software refer to:

- Apple's About the security content of iOS 11.2 at: https://support.apple.com/en-us/HT208334 [1]
- Apple's About the security content of tvOS 11.2 at: https://support.apple.com/en-us/HT208327 [3]
AFFECTED SYSTEMS:

- iPhone 5s and later, iPad Air and later, and iPod touch 6th generation.
- OS X El Capitan 10.11.6, macOS Sierra 10.12.6, and macOS High Sierra 10.13.1
- Apple TV 4K and Apple TV (4th generation)
- All Apple Watch models.

WHAT'S THE PROBLEM?

A remote attacker may exploit some of these vulnerabilities to take control of an affected system.

HOW DO I PROTECT MY COMPUTER?

Update your software

1. If IT Field Services or you have other IT support, no action on your part is required.
2. If you do not have IT support, for update information refer to Apple’s Security Updates listed above
