Security Update: Microsoft released their January 2018 updates to address 25 Critical and 29 Important vulnerabilities in various Microsoft products

Microsoft released their January 2018 updates to address 25 Critical and 29 Important vulnerabilities in various Microsoft products

**Status Type**

Security Update

**Private**

Public

**Date and Time**

Friday, January 5, 2018 - 16:02

**Reason**

Security update

**Impact**

Microsoft users

**WHAT HAPPENED?**

Microsoft released their January 2018 updates to address 25 Critical and 29 Important vulnerabilities in various Microsoft products.

**Advanced Users:** For a complete description of the security enhancements and affected software refer to:

AFFECTED SYSTEMS:

- Internet Explorer
- Microsoft Edge
- Microsoft Windows

WHAT’S THE PROBLEM?

Some of these vulnerabilities, if exploited, could allow an attacker to take control of an infected system.

HOW DO I PROTECT MY COMPUTER?

Update your software

1. If you are supported by ITFS or have different IT support, no action on your part is required.
2. If you do not have IT support or they do not support your computer, refer to Microsoft Security Update Guide at https://portal.msrc.microsoft.com/en-us/security-guidance
