Security Update: VMware has released one Security Advisory to address a CRITICAL vulnerability in VMware AirWatch Agent

VMware has released one Security Advisory to address a CRITICAL vulnerability in VMware AirWatch Agent

**Status Type**

Security Update

**Private**

Public

**Date and Time**

Wednesday, June 13, 2018 - 09:09

**Reason**

Security update

**Impact**

VMware AirWatch Agent users

**WHAT HAPPENED?**

VMware has released one Security Advisory to address a CRITICAL vulnerability in VMware AirWatch Agent.

**Advanced Users:** For a complete description of the security enhancement and affected software refer to:

- (VMware Security Advisories) VMSA-2018-0015: VMware AirWatch Agent updates resolve remote code execution vulnerability:  
AFFECTED SYSTEMS:

- VMware AirWatch Agent

WHAT'S THE PROBLEM?

Successful exploitation of these issues may allow a remote attacker to take control of an affected system.

HOW DO I PROTECT MY COMPUTER?

VMware recommends customers to review the patch/release notes for your product and version and verify the checksum of your downloaded file.

1. If you are supported by ITFS or have different IT support, no action on your part is required.
2. If you do not have IT support, updates may be obtained through VMware Security Advisories listed above.
