Security Update:The Internet Systems Consortium (ISC) has released a security advisory that addresses a vulnerability affecting multiple versions of ISC Berkeley Internet Name Domain (BIND)

The Internet Systems Consortium (ISC) has released a security advisory that addresses a vulnerability affecting multiple versions of ISC Berkeley Internet Name Domain (BIND)

**Status Type**

Security Update

**Private**

**Public**

**Date and Time**

Tuesday, June 19, 2018 - 09:57

**Reason**

Security update

**Impact**

BIND users

**WHAT HAPPENED?**

The Internet Systems Consortium (ISC) has released a security advisory that addresses a vulnerability affecting multiple versions of ISC Berkeley Internet Name Domain (BIND).

**Advanced Users:** For a complete description of the vulnerabilities visit:

**AFFECTED Systems:**
For affected systems, please refer to the CVEs listed above.

**WHAT'S THE PROBLEM?**
Exploitation of one of these vulnerabilities could allow a remote attacker to obtain sensitive information.

**WHAT DO I NEED TO DO?**
Users and administrators are encouraged to review the above CVEs and apply the necessary updates.
