Security Update:CERT Coordination Center (CERT/CC) has released information on vulnerabilities in WPA3 protocol

CERT Coordination Center (CERT/CC) has released information on vulnerabilities in WPA3 protocol

Status Type

Security Update

Private

Public

Date and Time

Monday, April 15, 2019 - 13:18

Reason

Security update

Impact

WPA3 users

WHAT HAPPENED?

CERT Coordination Center (CERT/CC) has released information on vulnerabilities in WPA3 protocol.

Advanced Users: For a complete description of the security enhancements and affected software refer to:

- **WPA3 design issues and implementation vulnerabilities in hostapd and wpa_supplicant: Vulnerability Note VU#871675** at: https://www.kb.cert.org/vuls/id/871675/ [1]

AFFECTED SYSTEMS:

- Please refer to the **CERT/CC's Vulnerability Note listed above.**

WHAT'S THE PROBLEM?

Exploitation of this vulnerability may allow a remote attacker to take control of an affected system.

HOW DO I PROTECT MY COMPUTER?

Update your software

1. IT is assessing impact and remediation strategy for enterprise-managed systems.
2. If you do not have IT support or they do not support your computer for updates refer to the CERT/CC's Vulnerability Note listed above.
